How to read this report

Completed sales use order completion dates and saved order prices, including paid extras.

Verified collections use payment dates. Unverified and rejected receipts are excluded.

Retained cancellation deposits use customer cancellation dates and are separate from completed sales.

Valid expenses use expense dates and exclude voided entries.

Operational result = completed sales + retained cancellation deposits - valid expenses. Collections are not added again.

Operational result is not accounting profit. Cost of goods sold and other accounting costs are unavailable.

Package order counts are per package and may overlap when one order contains several packages.
